

POWER-TRIM® CO. INC.

The Professional's Choice

MODEL 150

MODEL 200-4

MODEL 200-8

MODEL 300-H

MODEL 308-H

RIDES A CURB

Makes short work of ivy and other ground cover. All models (except 150) ride a 6 inch curb while edging.

TRIMS

No more hand-clipping grass and weeds near fences or walls. Just turn blade flat and mow (except 8" front wheel models).

BEVELS

Adjust cutting blade to any angle for easy edging along fences or flower beds.

EDGES CURVES

Tilt edger upon front wheel to trim circles and curves the easy, professional way!

Power-Trim Edgers

Power-Trim manufactures 5 models of wheeled gasoline powered lawn edgers equipped with either Briggs & Stratton or Honda engines. Our edgers are built to last with high quality materials which are why they are *The Professional's Choice* used by commercial gardeners and groundskeepers in the U.S. and abroad.

Specifications

Power-Trim edgers use an all steel base plate, steel wheels with solid rubber tires, and permanently sealed lifetime lubricated cutter head bearing assemblies. Parts are manufactured using heavy gauge metals and tubing and all painted parts are powder-coated with the finest baked urethane finish for maximum protection against weather deterioration.

- All Power-Trim edger frame components are 100% interchangeable - engine type and front wheel configuration determine the model number.
- Manual clutch disengagement is standard on all models.
- 8" wheel models offer extreme versatility when edging curves and circles along with the capability to bevel cut 10 degrees left of vertical.
- All curb-riding units will edge while riding a 6" curb.
- Using "Trim Mode" means no more hand clipping grass around poles and trees or along fences and walls - just turn the blade flat and mow.

MODEL	WEIGHT	ENGINE	FRONT WHEEL(S)	RIDES CURB	TRIMS
150	65 LBS	B&S - 550 SERIES	1 - 7" X 1.5"	NO	YES
